

Workshop Proposal (3 PD)

Artificial Intelligence “Data Understanding“

What data is suitable for the use of AI in your company?

Introduction

The exploration of potential AI use cases is followed by the „Data Understanding“ workshop, in which the problem of the AI use cases is concretized and translated into functional requirements. The aim of the workshop is to familiarize you with the procedure for AI solutions based on your concrete use cases. In addition, we will develop a concrete use case together and work out the necessary requirements to implement it successfully.

Our one-day workshop includes:

- Development of the concrete procedure for the implementation of your specific use case
- Support and advice within the context of the creation of an initial data set for the specific use case
- Development of the procedure for the explorative analysis of the data set
- Definition of the further steps for the creation of an AI model

Results

- Project plan to implement your use case
- Creation of a data set as a basis for exploratory data analysis
- Exemplary analysis of the data set in preparation for the creation of an AI model

€ 3.995,00 net. plus poss. travel expenses according to expense

We would be very pleased if this proposal meets your needs. If this is the case, but you would like to request any adjustments, please feel free to contact us at any time. We would be happy to design your individual workshop together with you.
