Workshop Proposal (1 PD)

Cloud Data Warehousing on the Azure platform

Cloud Data Warehousing

Most companies have already moved their IT systems to the cloud or are planning to do so in the near future. Data warehouse systems in particular represent a special challenge because they are connected to many other systems as a central platform and have usually developed a certain size and complexity over the years.

biX Consulting introduces you to the possibilities of the Azure platform as a possible cloud data warehouse platform and, together with you, draws up a roadmap of the steps necessary to move your existing data warehouse into a cloud solution based on SaaS. Our experts will advise you and can provide you with recommendations based on successful projects.

Overview Azure Platform

Cloud Data Warehouse Products

- Azure Synapse
- Databricks
- Snowflake

**Modelling in the Cloud**

Status Quo Assessment

- Existing Data Warehouse
- Connected systems
- Complexity

Creation of a roadmap

If desired, additional topics can be highlighted or special focal points can be set.

Results

- Overview of the function and scope of the Azure platform
- Comparison of possible data warehouse products incl. evaluation
- Insight into how data models are modelled in a cloud data warehouse
- Roadmap of what steps are needed to migrate to the cloud with an existing solution

€ 1.495,00 net. plus poss. travel expenses according to expense

We would be very pleased if this proposal meets your needs. If this is the case, but you would like to request any adjustments, please feel free to contact us at any time.
We would be happy to design your individual workshop together with you.
