„Health Check“

From Strategic Requirements to an Actionable Roadmap

The five-day Discovery Workshop (“Health Check”) translates your strategic planning requirements into a viable target architecture and a realistic, actionable implementation roadmap.

Goals

- › A structured analysis of your planning requirements
- › Technical specification of your objectives
- › Definition of a robust architectural and implementation strategy

Contents

01 | Getting to know each other, defining goals, and aligning expectations

02 | Structured and detailed requirements gathering

- › Scope of Planning and Reporting Functions
- › End-to-End Processes
- › Relevant Data Sources and Interfaces in Detail
- › A Detailed Look at Data Models and Planning Logic
- › Integration into Administration and Data Governance
- › Security and Authorization Concepts

03 | Identification and Prioritization of Use Cases

- › Evaluation of specific use cases for integrated planning and reporting

04 | Architecture and Roadmap Definition

- › Development of a target architecture based on SAP technology, including a potential implementation sequence and a realistic timeline

Results

- › A clearly prioritized roadmap
- › A defined target architecture
- › Selected and evaluated use cases
- › A solid basis for decision-making regarding the implementation of your integrated enterprise planning
