„Health Check“**

## Understand technology. Identify opportunities. Rethink planning.

This workshop combines an analysis of your current technical solution with a structured overview of modern SAP planning solutions, providing project participants and managers with a solid technical understanding.

### Goals

- Introduction to SAP planning solutions
- Empowering participants and project managers
- Initial assessment of your existing planning processes

### Contents

#### 01 | Basic Overview of Modern SAP Planning Solutions and Architectures

- SAP Analytics Cloud (SAC) – Reporting and Integrated Planning
- SAP Seamless Planning (SAP Datasphere)
- BPC-Live-Connection
- Architecture and Integration Scenarios
- Typical use cases, look and feel, and best practices

#### 02 | A First Look at Your Current Planning Solution

- Processes & Planning Objectives
- System and Data Architecture

### Results

- In-depth knowledge of SAP planning solutions and architectures
- An initial structured understanding of your current planning situation
- A shared foundation for business and technical discussions
